

# Sol Sisters Custom Tan

To have the best outcome for your custom tan the following are strongly encouraged. We are simply ensuring long lasting and outstanding results by offering this program and products for the preparation and maintenance of your custom tan.

## 24-48 Prior to Session:

**Exfoliate** your skin to balance itself and correct its pH levels naturally.

We sell Norvell® Exfoliator that provides a thorough deep skin exfoliation to nourish and moisturize your skin.

**Don't use on day of tan:** moisturizers, shaving gels, crèmes or waxes, bar soap or in-shower moisturizers less than 24 hours to tanning session as the oils contained in these products may cause a barrier on the skin, or effect pH levels and cause adverse results.

## Day of Session:

**Do not apply** lotions, moisturizers or perfumes prior to your tanning session. Use deodorant sparingly. Do not wear make up to your appointment (mascara is fine)

**Wear:** Dark, loose fitting clothing and remove jewelry. Tight clothes can rub off or smear bronzers. You can wear a bathing suit, tank top/shorts or even go nude.

## Post Spray Tan:

**Immediately** post tan avoid sweating because it will cause streaking of the bronzers. **Avoid** water, pools and spas (schedule pedi/mani appointments before spray tan). **Avoid water for at least 24 hours**, if you must shower before that time, use only water no gel soaps. **Avoid** loofahs and bath scrunches to maintain spray tan. Use lotion 2x / day and stay hydrated.

We recommend Norvell® Maintenance Kit for post-tan \$32.

Our Salon Location:  
2556 S. Crapo Road  
Ithaca, MI 48847
